

World leader in metrology and spectroscopy launches new Czech website

World leading metrology company Renishaw, has launched a new Czech language website to support its strong customer base in the Czech Republic.

The new website adds significant additional functionality to the previous site and contains details on the full range of Renishaw products, including CMM probe systems, touch probes and laser tool setters for CNC machine tools, linear and rotary encoders for position feedback, calibration systems for machine performance analysis, styli for touch probes and Raman spectroscopy systems for spectral analysis.

Key improvements include easier navigation, an enhanced search capability and a new resource centre where visitors can download an extensive range of Czech language brochures, data sheets, news articles and technical literature, plus have access to Renishaw documentation in many other languages.

Renishaw opened its first office in The Czech Republic in 2002, offering support and demonstration facilities for local customers. Located in Brno, Renishaw s.r.o. is run by General Manager Josef Slama, who commented, “The new website highlights the depth of technical knowledge and innovative solutions that exists within Renishaw for a wide range of metrology and spectroscopy applications. A key strength as a global leader is our ability to support our customers with the information that they require, whenever and wherever they need it, and the new website does just that.”

There are Renishaw web sites in nineteen different languages. As well as the major European languages, sites are also available in Russian, Japanese, Korean, Traditional Chinese and Simplified Chinese.

The Renishaw Group has more than 50 offices operating in 30 countries, with more than 2,150 employees.
