

Renishaw CNC Reporter

Floating window -
import data files and
populate the Capability
Chart and Overview tab

Delete inspection
reports and charts

Manually archive
inspection data

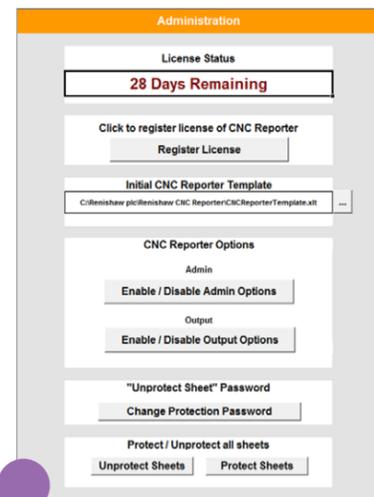

Import data file

Convert data
into tabular and
graphical formats

Data separation
settings

Information specific
to the measurement
process and inspected
component

Select inspection
software and NC
control type

Admin tab - product license
information and output options,
including export to Data Manager

Navigation tabs

Trend analysis
across multiple
components

Column filters to
adjust analysis

Capability Chart Data tab - filterable, graphical representation of the variation in
measured data for a single feature across multiple components

Statistical data analysis and
high impact visual indication
of component compliance

Overview tab - actual measured data: colour coded cells indicate adherence to tolerance.
Filter by Part number; Operation and Feature

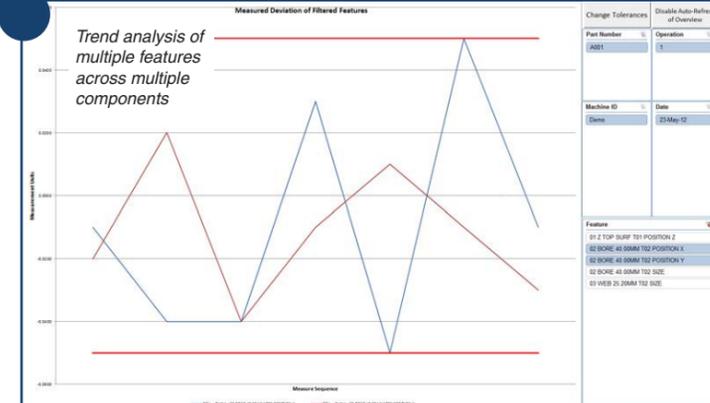

Data Manager

Archive Query tab - tabular view of archived inspection data
