

Renishaw Education Outreach

People like me training 2 hour workshop - Designed by WISE (Women in Science & Engineering)

People Like Me is a revolutionary approach to engage girls with careers in Science, Technology, Engineering and Maths (STEM). People Like Me uses the natural tendency of girls to articulate their self-identity using adjectives, to show them that people like them are happy and successful working in careers in STEM.

This visit to Renishaw will give you an insight into what we do, along with a quiz which will help you identify what sort of role you might be suited to in the future as a career. The visit will include the following: A brief tour of the Renishaw Innovation Centre, introductory activity, 'People Like Me Quiz', Job Types Analysis, Case Studies or Role Models, an interactive activity to take away.

What are the benefits to pupils attending this course?

- Learn about a local high technology engineering company
- Learn about the skills you have and how they can be applied to different roles
- Find out what different careers are available to young people
- Having fun with an interactive mini-project
-

Who should attend?

- Girls aged 11-14 studying maths and science and wanting to look further at possible career options.

Quotes:

- "I found the activity fun and would recommend it"
- "I think it was very accurate, I enjoyed it"
- "I enjoyed the experience, I think it helped me look at different jobs too"

Careers learning

- Work-related learning - collecting relevant information about opportunities available beyond key stage 4.
- Understanding different career pathways and the importance of attitudes, qualifications and skills to employers.
- The opportunity to experience different working environments.

Venue: Renishaw Innovation Centre, Renishaw plc, Wotton-under-Edge, Gloucestershire GL12 8JR

Time: AM and PM sessions available

Cost: FREE* - Just bring enthusiastic young people with an interest in Maths, Physics or Design & Technology; maximum of 30 pupils per workshop.

Date: Dates can be arranged to suit your school. Applications can be made by requesting a date directly by email.

*Please note - Pupils must be accompanied by a qualified teacher whose subject is related to the workshop being held. We would encourage the teacher to be involved with the workshop as much as possible.

About Renishaw

Renishaw is one of the world's leading engineering and scientific technology companies, with expertise in precision measurement and healthcare. The company supplies products and services used in applications as diverse as jet engine and wind turbine manufacture, through to dentistry and brain surgery. It is also a world leader in the field of additive manufacturing (also referred to as 3D printing), where it is the only UK business that designs and makes industrial machines which 'print' parts from metal powder.

The Renishaw Group currently has more than 70 offices in 35 countries, with over 4,000 employees, of which 2,700 people are employed within the UK. The majority of the company's R&D and manufacturing is carried out in the UK and for the year ended June 2016 Renishaw achieved sales of £436.6 million of which 95% was due to exports. The company's largest markets are China, USA, Germany and Japan.

Renishaw Innovation Centre

The Renishaw Innovation Centre was formally opened by HRH the Princess Royal in July 2015. The building is the largest new construction in the company's history and represents a £20 million investment for Renishaw and confidence in its future in Gloucestershire where it is already the county's largest private employer.

The additional 153,000 sq ft of space houses research and development and corporate services staff, as well as demonstration, training and conference facilities.

Within the Renishaw Innovation Centre all 40 meeting rooms are named after British innovators, primarily in the fields of science and engineering, but also innovators local to Renishaw's headquarters site such as Tyndale, Jenner and Pitman. The main conferencing facility is named after UK engineering icon Isambard Kingdom Brunel who was responsible for many iconic structures in the West of England region including the Clifton Suspension Bridge and the ss Great Britain. Other rooms are dedicated to significant innovators including Whittle, Faraday, Lovelace, Haslett, Babbage, Turing, Caxton and Stephenson.

Said Sir David: "This excellent new building is a place which we hope inspires people and whilst it is very much focused on the future and helping Renishaw and our customers to achieve ever greater technology breakthroughs, we are also very keen to honour those British innovators who have helped us as a society get to where we are today."
