

Verification Report

Verification Opinion

Verified as Satisfactory	
Based on the process and procedures conducted, there is no evidence that the GHG statement contained in the GHG Report "Renishaw GHG report" produced by Renishaw PLC,	is not materially correct and is not a fair representation of GHG data and information.
	has not been prepared in accordance with ISO14064-1: 2018 and its principles
The following improvements were raised in relation to future reporting	The identification of several errors, particularly in Purchased Goods, suggests internal data validation and checking processes could be more robust. The errors were corrected during the verification.
Lead Verifier	Stuart Jamieson
Independent Reviewer	Stuart Rogers
Signed on behalf of BSI	Matt Page, Senior Vice President, Assurance Services EMEA
Issue Date	12/8/2025
BSI Assurance UK Ltd, Kitemark Court, Davy Avenue, Milton Keynes, MK5 8PP, UK	
NOTE: BSI Assurance UK Ltd is independent to and has no financial interest in Renishaw PLC. This 3 rd party Verification Opinion has been prepared for Renishaw PLC only for the purposes of verifying its statement relating to its GHG emissions more particularly described in the scope above. It was not prepared for any other purpose. In making this Statement, BSI assurance ltd has assumed that all information provided to it by Renishaw PLC is true, accurate and complete. BSI assurance ltd accepts no liability to any third party who places reliance on this statement.

Verification Engagement

Organization	Renishaw PLC
Responsible party	Renishaw PLC
Verification Objectives	To express an opinion on whether the organizational GHG Statement which is historical in nature: • Is accurate, materially correct and is a fair representation of GHG data and information • Has been prepared in accordance with ISO14064-1: 2018, the criteria used by BSI to verify the GHG Organizational Statement
Materiality Level	10 %
Level of Assurance	Limited
Verification evidence gathering procedures	• Evaluation of the monitoring and controls systems through interviewing employees' observation & inquiry • Verification of the data through sampling recalculation, retracing, cross checking, and reconciliation
The verification activities applied in a limited level of assurance verification are less extensive in nature, timing, and extent than in a reasonable level of assurance verification	
Verification Standards	The verification was carried out in accordance with ISO 14064-3: 2019, ISO 14065: 2020 and ISO 17029:2019
Note: Renishaw PLC is responsible for the preparation and fair presentation of the GHG statement and report in accordance with the agreed criteria. BSI is responsible for expressing an opinion on the GHG statement based on the verification.	

Organizational GHG Statement

Organization		Renishaw PLC New Mills, Wotton-Under-Edge GL12 8JR
Organizations GHG Report containing GHG Statement		Renishaw Greenhouse GS Report FY2025
Organizational Boundary		Operational Control
Locations included in the Organizational Boundary <i>(if boundary is only the one site listed above this row can be removed)</i>		See Annex A
Scope of activities:		Precision technology business that provides manufacturing technologies, analytical instruments, and medical devices
Reporting Boundary:	Direct GHG Emissions (Scope 1)	Stationary combustion, Mobile combustion, Fugitive emissions
	Direct GHG Removals (Scope 1)	None
	Indirect GHG Emissions from imported energy (Scope 2)	Imported electricity
	Indirect GHG emissions from transportation (Scope 3)	Upstream transport and distribution of goods, Employee commuting and working from home, Business Travel
	Indirect GHG emissions from products used by organization (Scope 3)	Purchased goods and services, Capital goods, Disposal of waste Upstream leased assets
	Indirect GHG emissions associated with the use of products from the organization (Scope 3)	Downstream leased assets Investments
	Indirect GHG emissions from other sources (scope 3)	Other emissions from fuel-related activities (well to wheel)
Exclusions from Reporting Boundary		• Direct process emissions and removals arising from industrial processes (Not applicable) • Direct emissions in tonnes of CO₂e from biomass (Not applicable) • Indirect emissions from imported energy (Not applicable) • Emissions from Water use and Waste Water (Not Significant) • Emissions from Client and Visitor Transport (Not Significant)

Criteria for developing the organizational GHG Inventory:	ISO14064-1:2019 GHG protocol
Reporting Period	01/07/2024 to 30/06/2025

Category 1 : Direct GHG emissions	tc02e
Direct emissions from stationary combustion	719
Direct emissions from mobile combustion	2120
Direct fugitive emissions from the release of greenhouse gases in anthropogenic systems	303
Category 2: Indirect GHG emissions from imported energy	
Indirect emissions from imported electricity (market)	11
Indirect emissions from imported electricity (location)	9173
Indirect emissions from electricity consumption in electric/plug in hybrid vehicles	63
Category 3: Indirect GHG emissions from transportation	
Emissions from Upstream transport and distribution of goods	11655
Emissions from Downstream transport and distribution of goods	NS*
Emissions from Employee commuting	7800
Emissions from Employee WFH	766
Emissions from business travel	2735
Category 4: Indirect emissions from products used by organisation	
Indirect emissions from energy-related activities	2063
Emissions from purchased goods and services	62685
Emissions from capital goods	12990
Emissions from disposal of waste	237
Emissions from upstream leased assets	520
Category 5: Indirect GHG emissions associated	
Emissions from use stage of the product	66792
Emissions from downstream leased assets	171
Emissions from end of life stage of the product	79
Emissions from investments	99
Category 6: Indirect emissions from other sources	
Indirect emissions from fuel-related activities	661
Total emissions in tonnes CO₂e	
Location-based	181630
Market-based	172468

* NS = Emissions not stated
