

# RMI - radio machine interface

[www.renishaw.com/rmi](http://www.renishaw.com/rmi)

## Features

- Combined receiver and transmitter enables easy installation.
- Sealed to IPX8 for machine tool environment.
- Non critical receiver positioning.
- Three probe status outputs:
  1. SSR (N.O./N.C, pulsed/level).
  2. Driven at power supply voltage (trigger high/trigger low, pulsed/level).
  3. Driven output for Fanuc High Speed Skip.
- User configurable M-code input (pulsed or level).
- Interference free channel hopping transmission.
- Radio transmission uses 2.4 GHz giving greatest potential for single worldwide frequency.
- RMI meets the radio regulations of:
  - Europe: CE 0536!
  - USA: FCC ID KQGRMIV2
  - Japan: 004NYCA0405
  - Canada: IC: 3928A-RMIV2
  - Australia, China, Israel, New Zealand, Russia, Switzerland, Brazil, Taiwan, India, Thailand, Korea, Turkey, Indonesia, Malaysia and Mexico.
- Partner RMP60/RMP600 and RMI systems allow interference free multiple probe installations.
- No channel selection required.
- Configurable between side and rear exit.
- Operates on 12 Vdc to 30 Vdc.

## RMI status LEDs

Visual indication of system status is provided by LEDs.

1. LOW BATTERY/START
 

Red	Battery is low.
Green	M code start/stop in progress.
Yellow	Battery low & M code start/stop in progress.
Off	Battery is OK (and no M code start/stop in progress).
2. PROBE STATUS
 

Red	Probe triggered or unknown status.
Green	Probe is seated.
3. ERROR
 

Red	Error (other outputs may be incorrect).
Off	No error.
4. SIGNAL
 

Green	Full signal strength.
Yellow	Medium signal strength.
Red	Low signal strength, radio link may fail.
Off	No signal detected.
Green/off	Flashing: RMI is acquisition mode, and can acquire a partner RMP.
Red/yellow	Flashing: RMI has (just) acquired a new partner RMP.
5. Sealing gland.
6. Conduit.
7. Cable.

## Data sheet

Product name

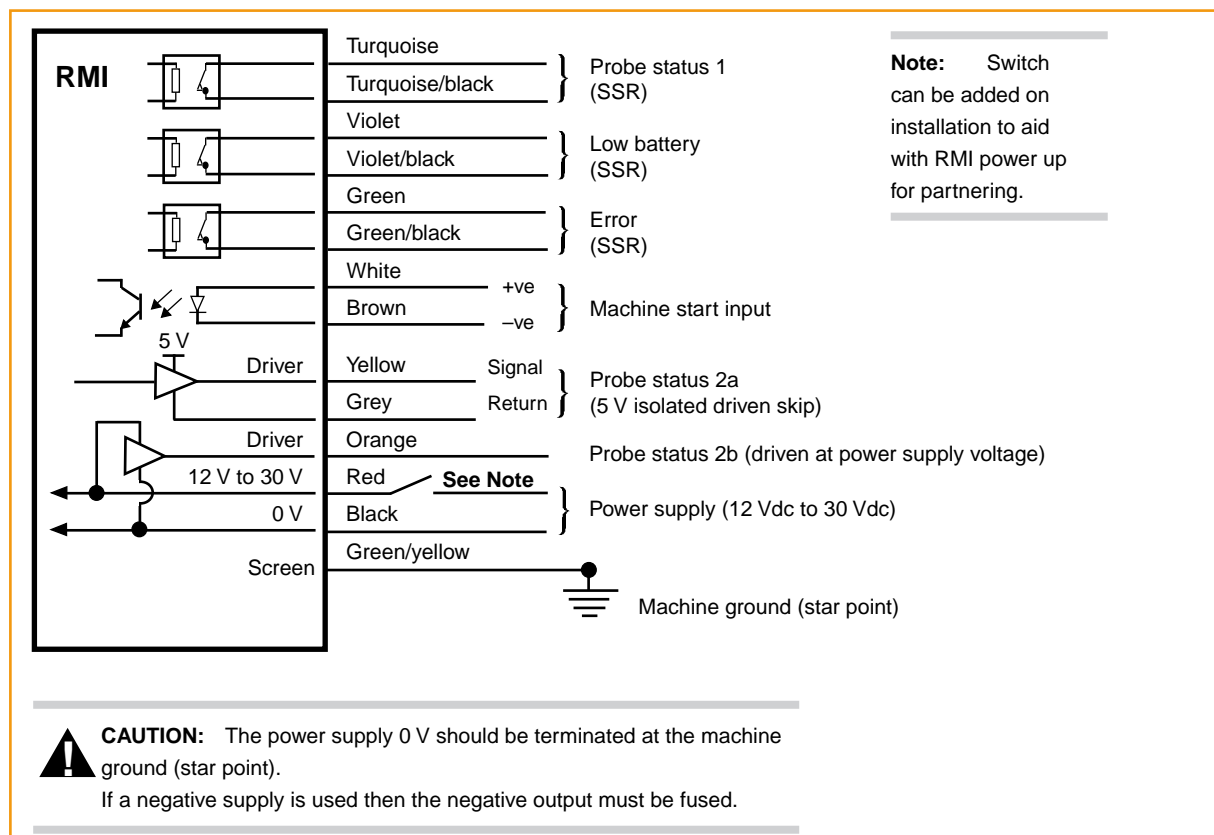

### LED operating features

1. The probe status LED will always be illuminated when power is present.  
There is no 'power present' LED.
2. All the indicators report the status of the partner RMP. If there is no partner in range, or the partner is off, then the probe status and error LEDs will be red and the other LEDs will be off.
3. When the RMI is powered, it will enter the acquire partner mode which will be indicated by the flashing green signal LED.  
After ~12 seconds, it will switch to its normal mode listening for its partner.
4. The conditions shown by the low battery, probe status and error LEDs are the same as those present on the electrical signal outputs.

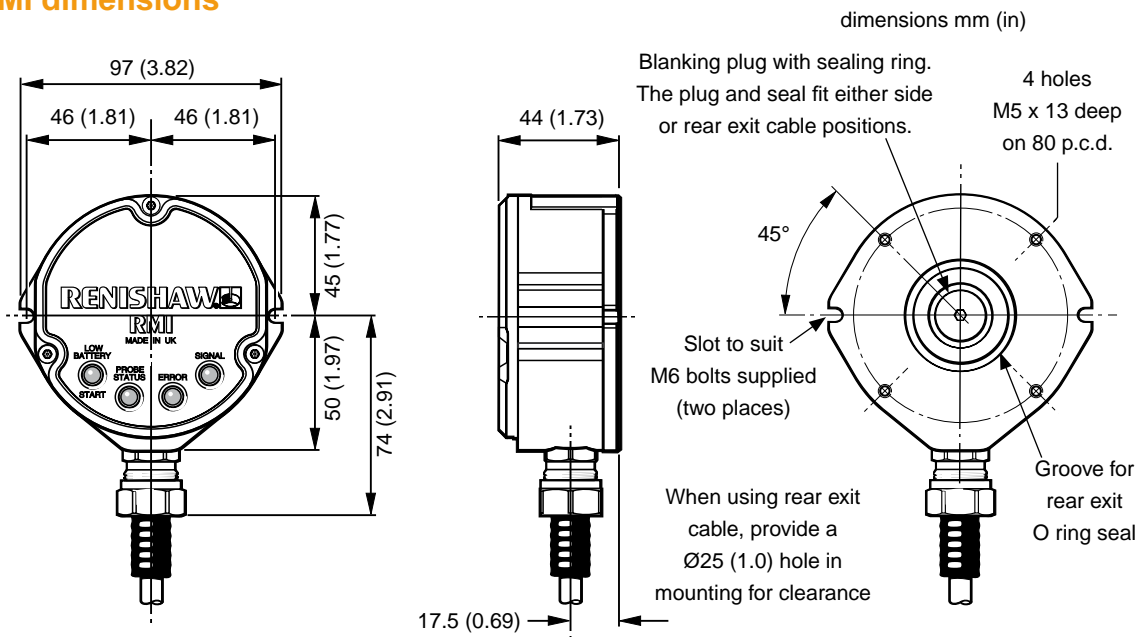

### Cable installation

- Install RMI with cable exiting from lower side for good coolant run off.
- Cable entry to the RMI is sealed with a gland.
- Cable protection against physical damage should be provided by flexible conduit.
- Route the cable away from potential sources of electro magnetic interference.
- Cable specification:  
Polyurethane cable Ø7.5 mm (Ø0.29 in),  
13 core screened cable, each core 18 x 0.1 mm.  
15 m (49 ft) is standard length.
- Alternative cable lengths available up to 50 m (164 ft).

### Wiring diagram (with the output groupings shown)

## RMI dimensions

### Weight

In box = 1,980 g (69.84 oz)

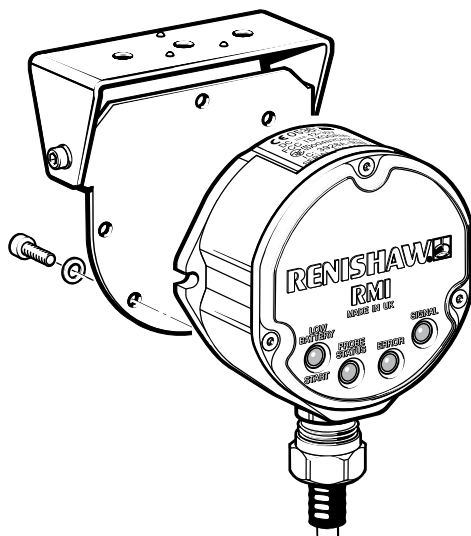

RMI including 15 m (49.2 ft) of cable is 1,540 g (54.3 oz).

## Mounting bracket (optional)

allows RMI directional setting

### RMI optimum position setting

To assist finding the optimum position for the RMI during system installation, signal strength received is indicated by signal LED. Always face the RMI towards the operating area (and tool store when using radio turn-on).

Install RMI with cable exiting from lower side for good coolant run off.

The mounting bracket cannot be used with an RMI in rear exit configuration.

Do not apply any metallic label to the front cover, as this will shield the antenna.

Paired holes permit RMI mounting in alternative orientation.

## Specification

<b>Primary application</b>	Medium to large machining centres, 5-axis twin spindle machines and vertical turret
<b>Transmission type</b>	Frequency hopping spread spectrum (FHSS) radio 2.400 GHz - 2.4835 GHz 2400 MHz - 2483.5 MHz
<b>Transmission range</b>	Up to 15 m (49.2 ft).
<b>Weight</b>	In box 1,980 g (69.84 oz) RMI including 15 metres (49.2 ft) of cable 1,540 g (54.30 oz)
<b>Cable</b>	15 m (49.2 ft.) standard length. Optional 30 m (98.4 ft) and 50 m (164 ft) cable assemblies are also available. Screened, 13 core (each core 18 x 0.1 mm).
<b>Mounting</b>	Mounting bracket allowing directional setting.
<b>Sealing</b>	IPX8

## Environment

<b>RMI</b>	<b>Temperature</b>
<b>Storage</b>	-10 °C to 70 °C (14 °F to 158 °F)
<b>Normal operating</b>	5 °C to 50 °C (41 °F to 122 °F)

## Parts list – please quote the part number when ordering equipment

Type	Part no.	Description
RMI	A-4113-0050	RMI, side exit, with 15 m (49.2 ft) of cable, tool kit and user's guide.
Conduit kit	A-4113-0306	Conduit kit comprising 1 m (3.28 ft) of polyurethane conduit, bulkhead connector, seal and nut (16 mm thread).
Mtg brkt	A-2033-0830	Mounting bracket.
Cover assy	A-4113-0305	Cover/antenna assembly: including cover screws and O ring.
Cover assy	A-4113-0302	Cable assembly 15 m (49.2 ft) long.
Cover assy	A-4113-0303	Cable assembly 30 m (98.4 ft) long.
Cover assy	A-4113-0304	Cable assembly 50 m (164 ft) long.
Tool kit	A-4113-0300	T10 tamperproof key, 4 mm hex key, 14 x ferrules, 4 x M5 screw, 2 x M5 nut, 4 x M5 washer, O ring (Ø34.5 x 3 mm).
