

Machine tool probe upgrades

Upgrade your productivity levels with one of Renishaw's new generation of probes

OMP40-2

The OMP40-2 from Renishaw meets the demand for probing on small to medium size machining centres.

OMP400

The OMP400 is Renishaw's new compact probe for small to medium size machining centres, successfully combining the miniaturisation of the popular OMP40 probe, with high accuracy RENGAGE™ strain gauge technology. It has excellent 3D performance which allows probing of contoured surfaces whilst maintaining very high accuracy.

OMP60

The OMP60 is a new optical probe suitable for medium to large size machining and mill-turn centres.

RMP60

The RMP60 inspection probe is the world's first frequency hopping radio probe. No channel selection is required. Once matched, the RMP60 and RMI hop frequencies together to provide reliable interference-free communications.

Machine tool probe upgrades

**Exchange your
old MP16/MP18 for
an RMP60.**

There has never been a better time to upgrade to the RMP60 and take advantage of the following benefits:

- Compact size.
- Robust stainless steel housing.
- Industry-leading resistance to shock and vibration.
- No channel selection required - RMP60 and RMI interface are paired using Renishaw's patented Trigger Logic™.
- Unique frequency hopping transmission* offers unrivalled immunity to interference and allows an unlimited number of systems to coexist with other radio transmission industrial equipment.
- M-code turn-on / off at full operating range, with other turn-on / off options selectable using Trigger Logic™.
- Extra long battery life using standard AA batteries.
- Fast and easy battery changing using a quick release battery cassette.
- External stylus trigger force adjustment.
- Compliant with radio regulations in EU, USA, Japan, Canada, Switzerland, Russia, Australia, New Zealand, Israel, China, India, Turkey, Thailand, Taiwan, Brazil and Korea, with more regions to follow.

No other system comes close!

* Patents applied for.

The MP16 and MP18 have been obsolete since March 2005
