

Product: ezLinkNC

Version: 30109

Codebase: 20090711267

ezTrack reports

ezippcompare#3 - Produce a 'thin red line' for mangling the RWCompare command (Closed)

MSPCC Release Notes

mspcc26719 - Apply comparator results to the PtMeas responses

ezLPPCompare now manages fully the PtMeas command. The master comparator is applied to the measured data and the response string is modified accordingly.

Codebase: 20090827277

ezTrack reports

ezippcompare#35 - Memory Leak (Assigned PB)

ezippcompare#48 - Mapping Measured Points to Nominal is limited (New)

MSPCC Release Notes

mspcc26967 - create robust Nominal To Measured Point Mapping

Fixed bug where, when performing ScanOnCurve commands whilst in a Compare Mode, ezLinkNC would out of memory and vanish

Fix bug where if points were not returned for each and every Nominal node then the mapping of Nominal Data to Scanned data would get out of sync.
