ezTrack reports

ezippcompare#134 - Email: PtMeasMissing (Assigned PB)

MSPCC Release Notes

mspcc28621 - PtMeas is lost during CMM compare

Fix bug in calibration loading.

A problem was seen when loading a Calibration file that included Touch Points, the PtMeas associated with it would return no data in the "Measure" phase.

The same applies to Scans that are calibrated with PtMeas.

No changes are required to existing .cal files.
