ezTrack reports

aries mill#53 - Move parameters require synchronisation with server (Assigned QC)

MSPCC Release Notes

mspcc32471 - Investigate and implement sync of speed and accel properties between mill and server

-Update to Aries Mill, allowing synchronisation of active tool parameters with Equator Server.

Codebase: 20120904407

ezTrack reports

ezippcompare#228 - ScanOnCircle not running with pass-through data (New)

MSPCC Release Notes

mspcc32566 - Investigate data being return at less than passthrough density

Fix bug in ScanOnHelix and ScanOnCircle which caused pitch limited data to be returned for external measurements rather than pass through. This will improve the repeatability of external Circles and Helices.
