

Register today for the

Manufacturing Excellence

event this April

Do you want to understand and adopt the latest engineering technologies used by large aerospace OEMs?

**Wednesday 10 April 2013, 9.30
at Renishaw, New Mills, Gloucestershire**

Renishaw, the global metrology specialists, are collaborating with TEAM Engineering and WEAFF (West of England Aerospace Forum), to hold a Manufacturing Excellence event including representatives from leading aerospace OEMs and Siemens.

Manufacturing Excellence is about utilising the latest engineering technologies to build exceptional quality parts. By adopting new techniques companies are able to increase throughput, reduce their scrap and improve traceability resulting in a high value product.

Delegates will be introduced to the latest advanced manufacturing technologies by engineering experts, showing subcontractors how they can significantly improve their manufacturing processes and profitability.

Register for your free place today but hurry places are limited!
