Summary:

To ensure that Renishaw conforms to the impending RoHS (Restriction of Hazardous Substances) compliance requirements, it has been necessary to introduce a new series of part numbers for the PH10 range of heads. These new part numbers will provide a clear distinction between product that is non-RoHS compliant and product that is RoHS compliant. These part numbers are available for use now and should be used on all future orders. Existing orders will be changed to the new part numbers as appropriate.

For new head orders, four new part numbers will replace the previous part numbers. Only RoHS compliant heads can be ordered for new sales. These are shown in the table below. All kit part numbers will remain unchanged.

Description	Old part number	New part number
PH10M PLUS	A-5863-1000	A-5863-4000
PH10T PLUS	A-5863-2000	A-5863-5000
PH10MQ PLUS	A-5863-3000	A-5863-6000
PH10M-iQ PLUS	A-1025-1800	A-5863-7000

Please see the RBE part number changes on the next page.

For orders of RBE units, new part numbers have been added to the current range of RBE part numbers. The head type being returned (whether non-RoHS compliant or RoHS compliant) will determine which replacement should be ordered for the RBE transaction.

RBE transactions for non-RoHS compliant items being returned to Renishaw can be replaced with the same, non-RoHS compliant version of the product. Please order the correct RBE part number to match the product that is being returned.
