apply innovation™

Shank modifications for machine tool probes

The following modifications can be made to various types of shank, for example DIN69871, BT and HSK.

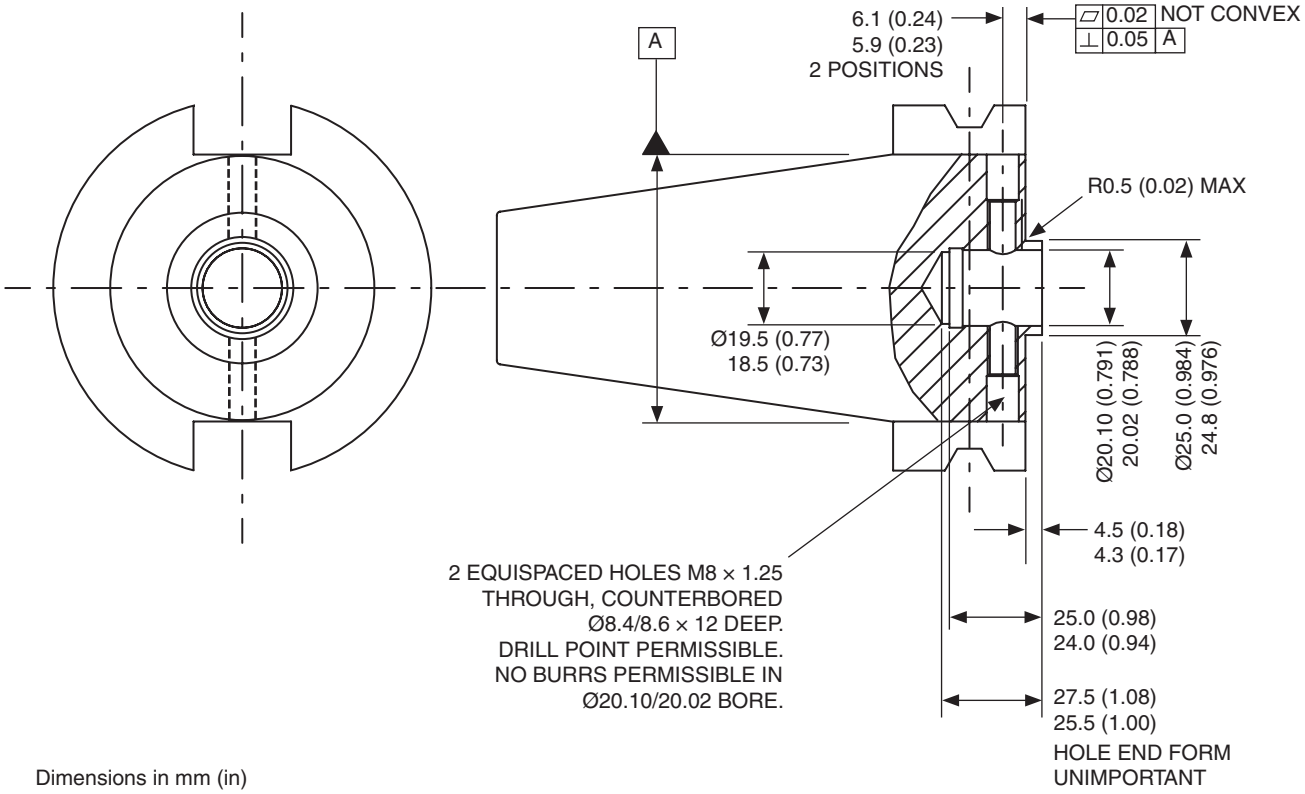

For details of available shanks, see the *Taper shanks for machine tool probes* data sheet (Renishaw part no. H-2000-2011), or contact your Renishaw supplier.

Consider the layout of the machine tool before modifying the shank. For example, ensure that fittings on the spindle housing do not obstruct access to the screws in the shank nose.

For details of individual probes, refer to the relevant data sheet.

The drawing below shows how to adapt shanks for the following probes:

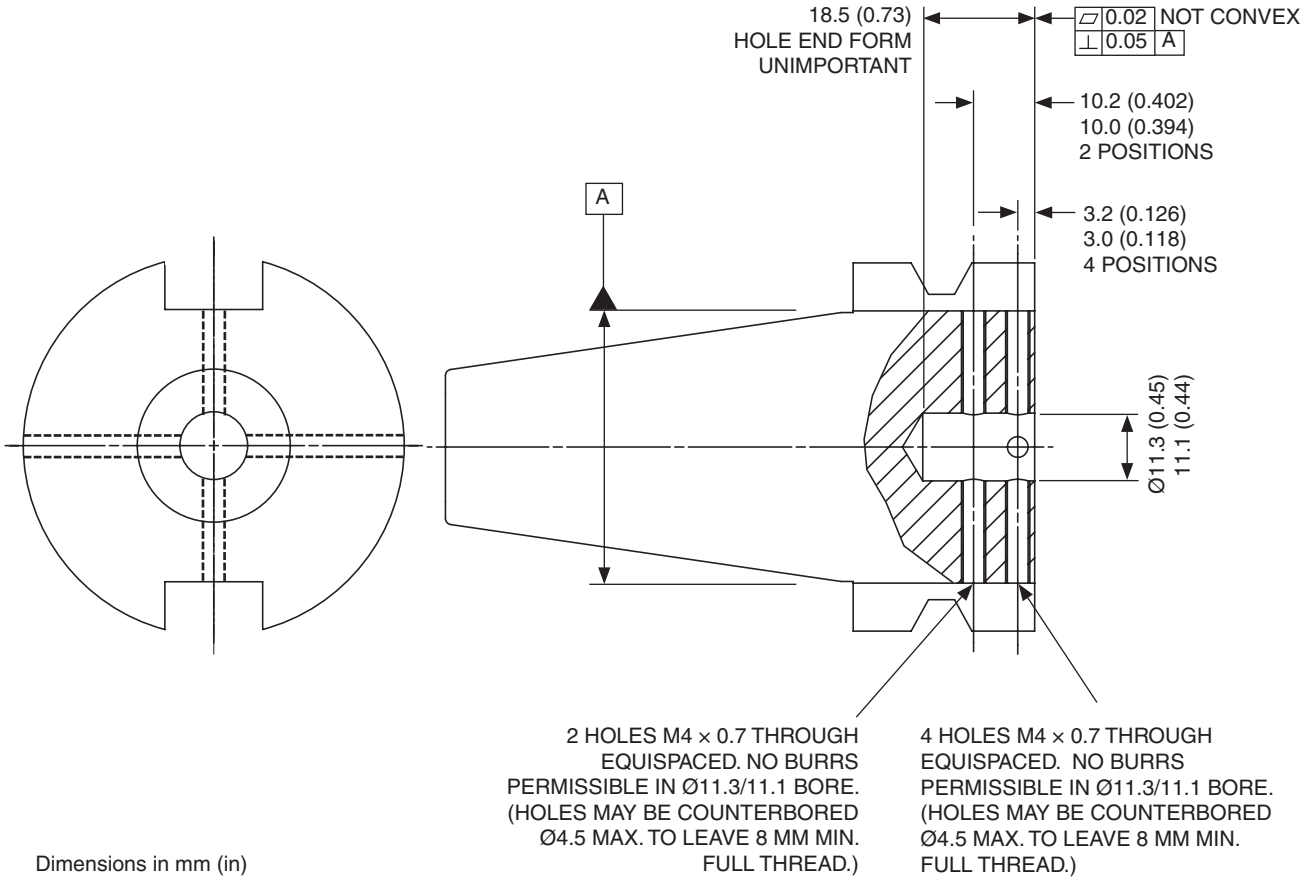

- OMP60
- RMP60
- MP11

Dimensions in mm (in)

The drawing below shows how to adapt shanks for the following probes:

- OMP40-2
- OMP400

Dimensions in mm (in)

Spare parts and accessories

A full range of spare parts and accessories is available. Contact Renishaw for a full list.
